
The first Żabka Nano will be launched in a hospital

Żabka Group strives to provide customers with convenient access to the highest quality products in every possible place, so it develops the project of autonomous shops and is now planning to open the first such facility in a hospital. Thanks to Żabka Nano, located on the premises of the Regional Hospital in Poznań, both its patients, visitors, and employees will be able to purchase products from the extensive offer of the chain 24 hours a day, 7 days a week.

Żabka Nano on the premises of the Regional Hospital in Poznań is located in front of the main entrance (entrance A), next to the rotunda, at the parking lot, which is accessed from Juraszów Street. This is so far the smallest autonomous store of the chain - the area of the sales hall is 16 m². The store will be opened in the second quarter of this year. Access to the facility will be possible using any payment card or Żabka mobile app. with a payment card linked to Żabka Pay.

– Opening a Żabka store is always an opportunity for the local community to do quick shopping. The hospital is another type of location where our autonomous store is available to customers because according to our mission, we want to provide them with convenience wherever possible – says Paweł Grabowski, Head of Unmanned Solutions at Żabka Future.

Despite the small size of the store, the product mix offered by Żabka Nano store on the premises of the Poznań Hospital will include about 900 products. It will include products from the Żabka private labels, such as Szamamm ready-made dishes, Tomcio Paluch sandwiches, Foodini liquid snacks, juices and lemonade Wycisk, and freshly ground coffee from the coffee machine. Due to the location and needs of the hospital patients, the store will also have an extensive range of hygiene products.

– The Regional Hospital in Poznań, as the first in Poland, will enable its patients, visitors, and employees to shop in the Żabka chain store. We have offered to work together because it is in line with our vision of providing high-quality services and reaching out to modern solutions. Żabka Nano store means that our non-medical offer will be enriched by a much-needed, friendly place being at the very top European level. We are convinced that the functioning of such a store on the premises of the hospital will mainly benefit patients because it will be open 24 hours a day, 7 days a week. Just like the Hospital – adds Piotr Nowicki, Director of the Regional Hospital in Poznań.

Europe's largest chain of autonomous stores

Żabka Nano is an innovative concept that changes and shapes the perception of consumer experiences. The first store started its activity in June 2021 in Poznań. Today, Żabka Nano is the largest chain of autonomous stores in Europe. It has more than 50 facilities of this type, and there are plans to open several dozen more. Żabka Nano stores are located, among other places, in places where - due to limited space or legal requirements - the standard facility of Żabka chain would not fit, for example, in office buildings, fitness clubs, or dormitories. They are also an important part of the urban fabric - they are present on important city streets or metro stations.
